The image shows a composite screenshot of the Uber Eats mobile application. On the left, a search results page displays options like 'Chef Lagenda Toorak' and 'Grill'd'. In the center, a detailed view of a 'Mighty Melbourn' burger is shown with a map of its location. On the right, an order summary screen indicates an estimated arrival time of 2:25, Chris picking up the order, and delivery details to 217 Glenferrie Rd, Malvern VIC 3144, Australia.

Orders			
Order ID	Delivery Address	Price	Status
F8762	7801 Tanglewood Drive Elkton, MD 21921	\$ 33.99	Accepted
A9245	81 High Point Dr. Greenwood, SC 29646	\$ 94.35	Pending
Y7902	8783 Wakehurst Road Champlin, MN 55316	\$ 6.99	Declined

Prerequisites

||| 1. Asset Bundle (dummy data, PDF presentation):

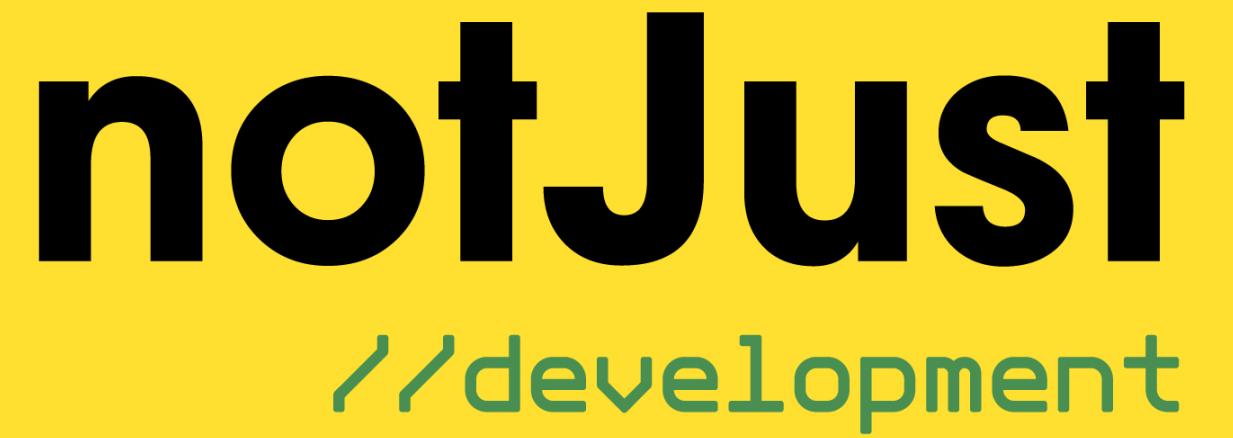

|| <https://assets.notjust.dev/ubereats>

||

| | 2. Expo environment setup

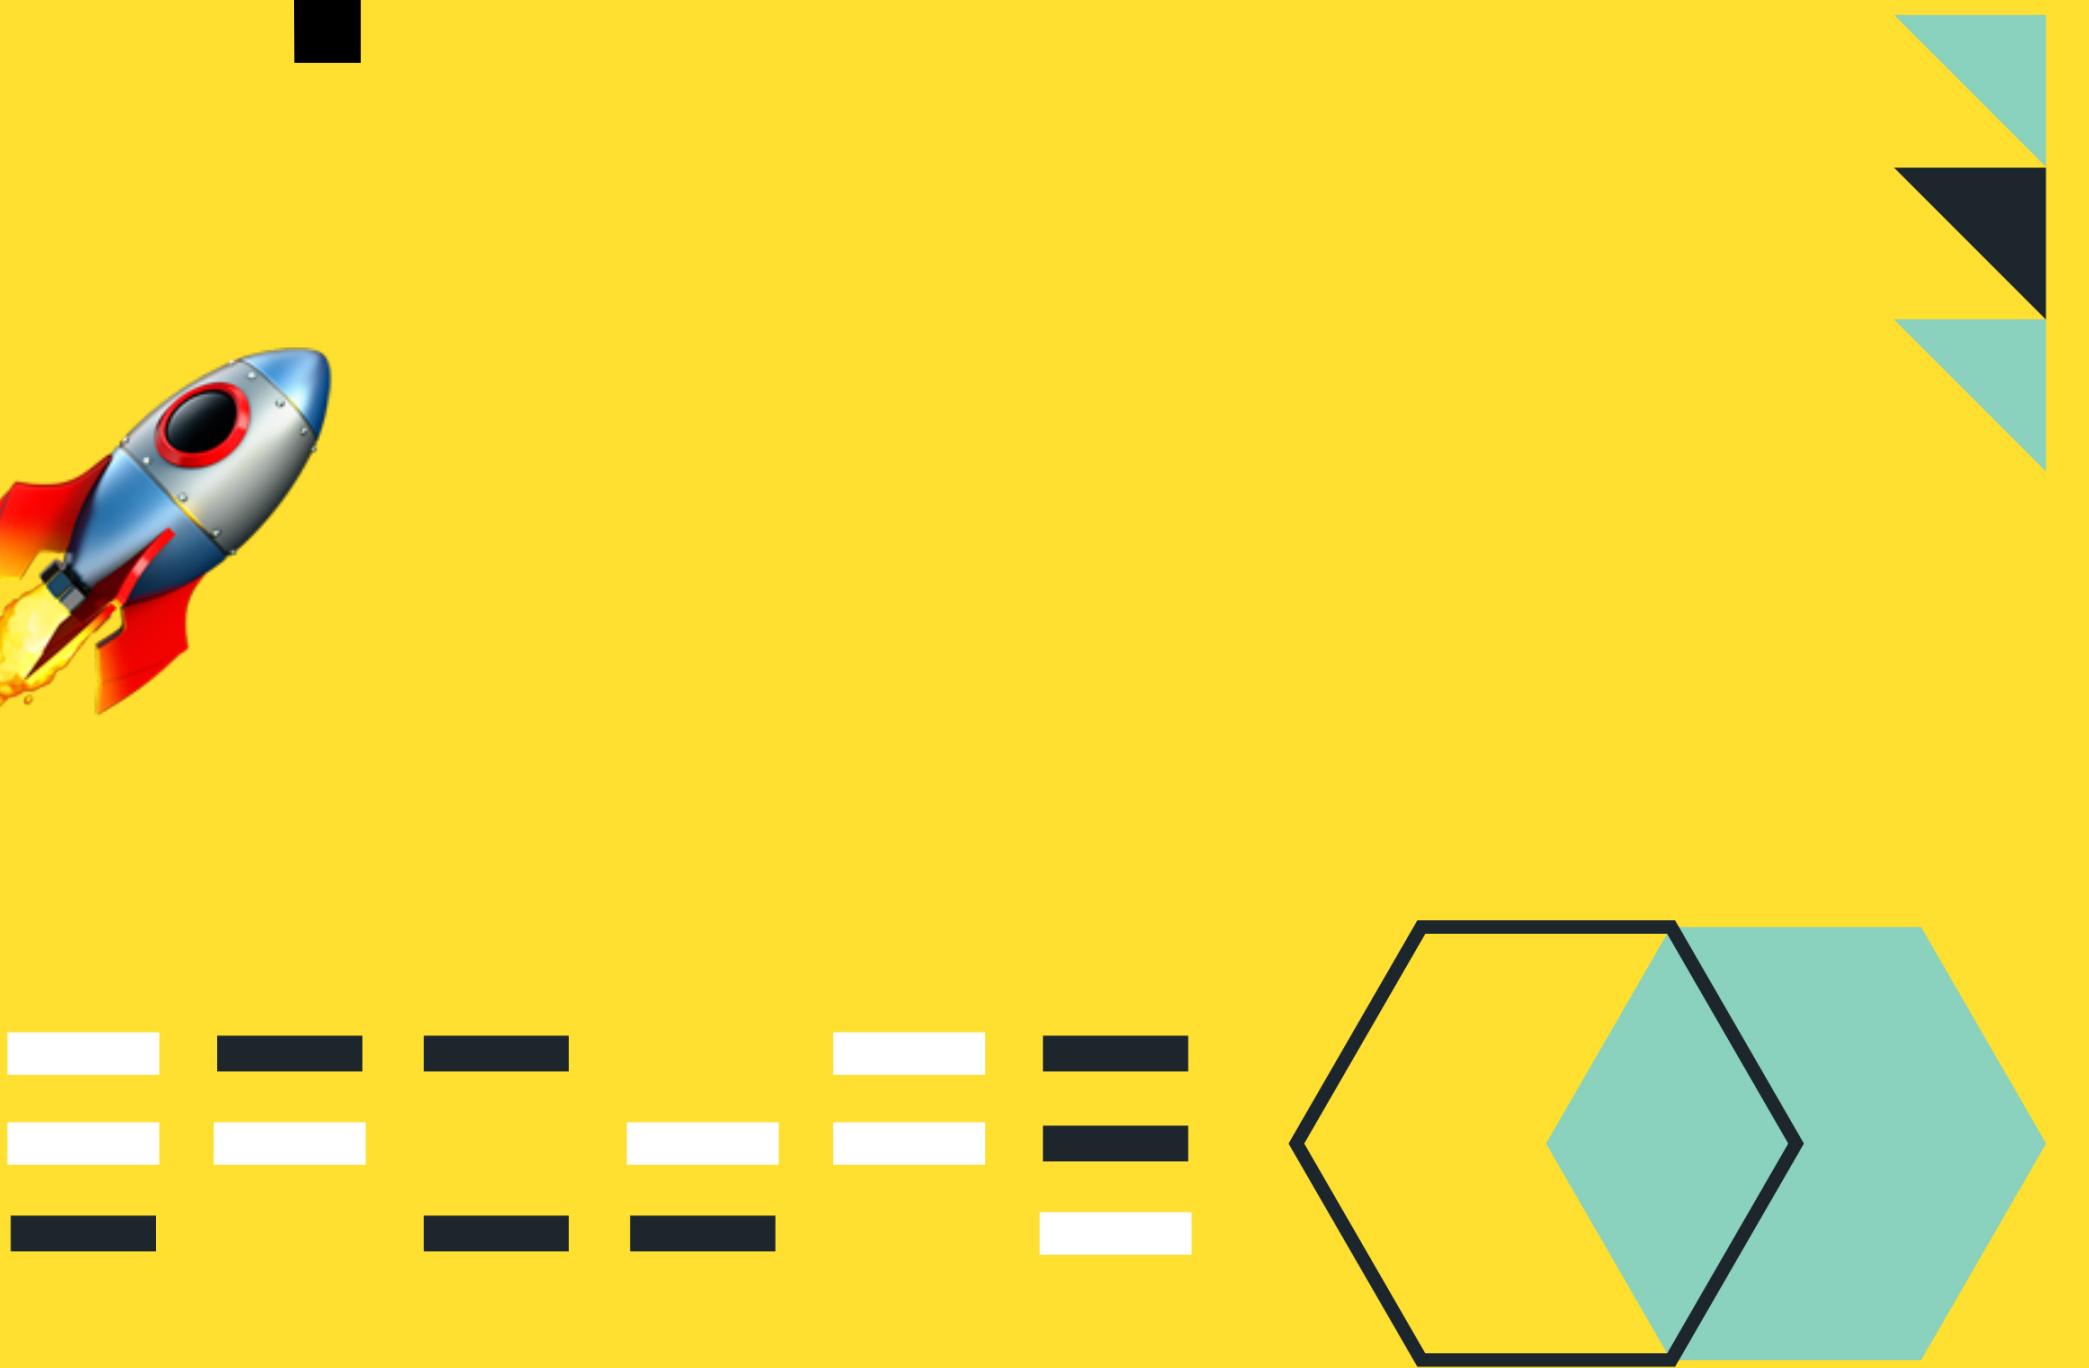

| | <http://bit.ly/expo-vadim>

|||

Let's get started

Day 4

Who am I

- Full stack developer for >7yrs
- Founded multiple startups
- ex Amazon SDE
- Passionate about coding and building impactful startups.

I AM notJust
//developer

Install the dependencies in our project

```
||| npm install aws-amplify aws-amplify-react-native @react-native-community/netinfo @react-native-async-storage/async-storage @react-native-picker/picker
```

Connect our React Native app with the Amplify backend

||| 1. Grab the pull command from Amplify Studio (from the top right corner)

||| 2. Execute the command in the root directory of your project

||| 3. Configure Amplify

```
||| import { Amplify } from 'aws-amplify'  
||| import awsconfig from './src/aws-exports'  
||| Amplify.configure(awsconfig)
```

Data modeling

Add the driver model and the relationship with the Order

Implement Authentication

```
||| import { withAuthenticator } from "aws-amplify-react-native";  
||| export default withAuthenticator(App);
```

notJust

//development

User (driver) CRUD

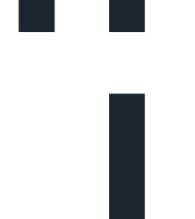

Orders CRUD

1. Fetch orders

2. Accept order

3. Update status of the order

Real time data with subscriptions

- | | | 1. Update the driver location
- | | 2. Listen to new orders updates

Hi everyone!

I'm Nicolas from France.

I'm currently employed as a front-end engineer but I'm also working on 2 side projects I'm super excited about. I'd like to monetize them and quit my job by the end of this year (or mid-2022 at the latest).

First apps!

Hey everybody,

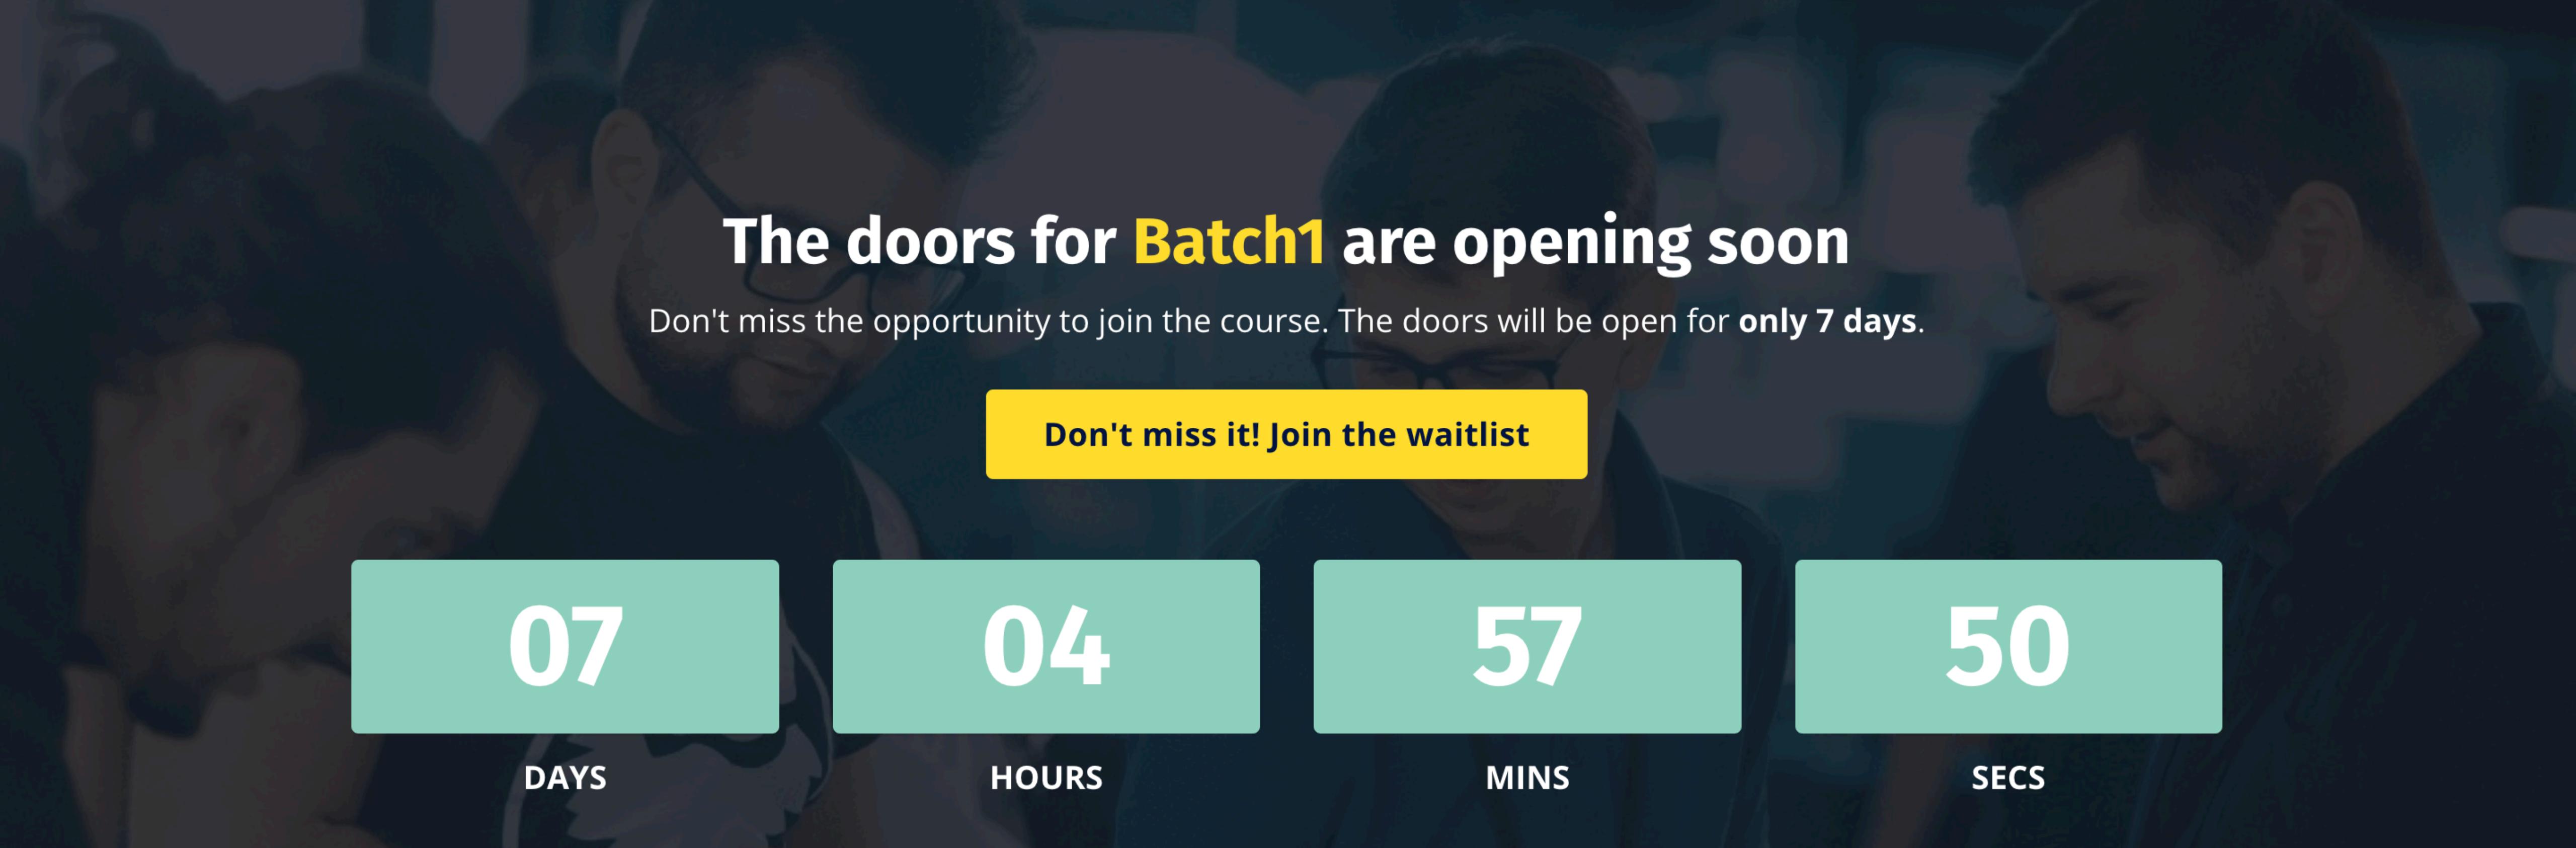

Thanks to hard work and Vadim , I now have an app in each store!! (Both my apps will be available in both stores, but each is pending in one)

Launching next Monday, 25th April

 8 am PT  11 am ET  4 pm WEST  8:30 pm IST

The doors for **Batch1** are opening soon

Don't miss the opportunity to join the course. The doors will be open for **only 7 days**.

||| Day 1: User app UI | React Native

|| Day 2: User app backend | AWS Amplify

|| Day 3: Driver app UI | React Native

|| Day 4: Driver app backend | AWS Amplify

||| Day 5: Restaurant dashboard | ReactJS and AWS Amplify

The image shows a mobile application interface for a food delivery driver. At the top, the "Uber Eats" logo is displayed. Below it, a green navigation bar contains the word "Orders". To the right of the navigation bar, there is a table titled "Orders" with four columns: "Order ID", "Delivery Address", "Price", and "Status". The table lists three orders:

Order ID	Delivery Address	Price	Status
F8762	7801 Tanglewood Drive Elkton, MD 21921	\$ 33.99	Accepted
A9245	81 High Point Dr. Greenwood, SC 29646	\$ 94.35	Pending
Y7902	8783 Wakehurst Road Champlin, MN 55316	\$ 6.99	Declined

At the bottom right of the table, there are navigation arrows for page 1 of 1.
